## PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with strong foundations in **Java, Python, JavaScript, Data Structures & Algorithms, and Object-Oriented Programming**. Solved **300+ LeetCode problems**. Strong problem-solving and analytical skills with a focus on building reliable, user-focused technology solutions.

## EDUCATION

**B.Tech in Computer Science Engineering (AI & Machine Learning)** 2024 – 2028

GL Bajaj Institute of Technology and Management, Greater Noida, Uttar Pradesh

**CGPA: 8.74/10**

**Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems

## TECHNICAL SKILLS

**Programming Languages:** Java, Python, JavaScript

**Frontend Technologies:** React.js, Vite, HTML5, CSS3

**Database:** MySQL

**Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems

**Development Tools:** Git, GitHub, VS Code

**Technologies:** REST API Integration, Progressive Web Applications (PWA), Responsive Web Development, Environment Variables

## PROJECTS

**PayFlow – Offline Payment Simulator** React.js, Vite, JavaScript, PWA

- Engineered an offline payment simulation platform using **React.js and Vite** to model UPI-style payment workflows without processing real financial transactions.
- Developed **7 application modules** including Login, Registration, Dashboard, Send Money, Transactions, Add Account, and Profile using reusable React components.
- Implemented **Progressive Web Application (PWA)** capabilities with service-worker caching and asset precaching to support offline application access.
- Configured the PWA manifest, service worker, and caching strategy using **vite-plugin-pwa** to improve application availability in offline environments.
- Designed responsive interfaces for desktop and mobile devices with consistent navigation and user-focused workflows.

**News App** React.js, Vite, JavaScript, NewsAPI

- Developed a responsive news application using **React.js and Vite** to retrieve and display real-time news through REST API integration.
- Implemented category-based content browsing using reusable React components for organized information discovery.
- Integrated **infinite scrolling** and loading states to provide continuous content browsing across desktop and mobile devices.
- Secured API credentials using **environment variables** and followed component-based architecture for maintainable frontend development.

## ACHIEVEMENTS

- Solved **300+ LeetCode problems**, strengthening analytical thinking and problem-solving skills across Data Structures & Algorithms.
- Advanced to Round 2** of the **Myntra WeForShe Hackathon** after being shortlisted from Round 1.
- Advanced to Round 2** of **Flipkart GRiD 8.0** after qualifying through Round 1.

## CERTIFICATIONS

- AWS Cloud Foundations** – Amazon Web Services; scored **90%** in final assessment.
- 30-Day AI Masterclass with Live Projects**

## ADDITIONAL INFORMATION

**Areas of Interest:** Software Development, Data Structures & Algorithms, Web Technologies, Cloud Technologies, Artificial Intelligence and Machine Learning
